

Swim Safety Item

Any person swimming through a diver's path, intentionally or unintentionally, will be warned by the lifeguard. Repeated infractions whether intentional or not will result in loss of pool privileges.

A diver's path is defined as the area surrounding the diver once the diver steps onto the diving board until 20 seconds after the diver enters the water. Swimming through the diver's path is not acceptable.

Also, swimming too close to another swimmer, who has not invited you to do so, whether intentional or not may startle the other swimmer and be a cause for concern. Repeated instances will result in warnings from the lifeguard and may result in loss of pool privileges.
